PORTABLE GAS DETECTOR VOHLJAČ

DESCRIPTION, APPLICATION

Portable gas detector Vohljač is designed for measuring explosive gases (propane, butane, methane) in boiler houses, detection of gas leakage on instalations, pipes, valves, etc. Vohljač is built of polycarbonate housing and one sensor measuring head.

Portable gas detector Vohljač signalls:

- Gas presence
- Error (empty battery, sensor fault).

Device has a LED display, which shows gas concentration in % LEL (LEL - lower explosion level), battery control and start delay prior to sensor heating.

TECHNICAL DATA

Supply voltage	battery 3,6 V
Power consumption	max. 220 mA
Measuring range	0 - 50 % LEL
Delay start	30 s
Housing	polycarbonate
Sensor enclosure	metal
Alarm	20 % LEL
